

Enterprise Business Management Spacebiz

Powered by Open Source

Web Based • Stable • Affordable • Unique • Remotely Supported • Customizable

See Online Demo <http://www.spacesoft.biz/>

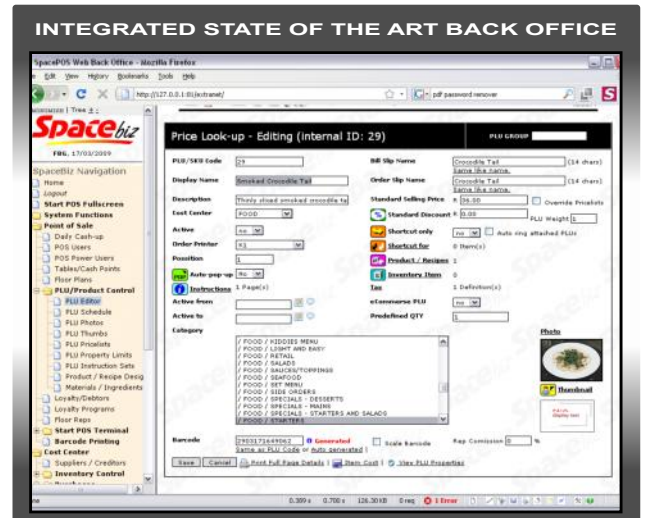

Welcome to the Future of Point of Sale and Business Management Software. SpaceBiz is the first fully web based Point of Sale in the World. The platform is of Enterprise level and exists for more than 9 years, however we are also the most cost effective Point of Sale with integrated Back office on the market. This is made possible as we are using Open Source Tools. Functionality-wise, SpaceBiz is probably the most advanced management system you can get - world wide. The system consists of superior Cash control, 4 different Stock control systems, Debtors and Creditors, Production / Recipe costing and design, Recipe & product printing with photos, Live remote access, Barcode generation and much more. Please look at the back of this page.

FRONT OF HOUSE / WEB BASED (RUNS IN FIREFOX)

INTEGRATED STATE OF THE ART BACK OFFICE

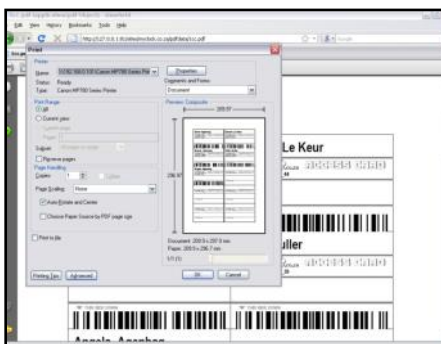

Being web based, SpaceBiz opens new horizons for the maintaining and reporting of your business from a central location or anywhere over the Internet. The hardware requirements for SpaceBiz are minimal and there is no special devices required. SpaceBiz supports Slip Printing, Pole Displays, Secondary Screen, etc. SpaceBiz is suitable for large organisations as well as small organisations. The package includes monthly remote support of all PC stations and server. The system is hosted in-house and does not depend on an internet connection. The technology used is: HTTP - Apache, RDBM - MySQL, CGI - Perl, AJAX and Adobe Flash. Similar technology is used by Yahoo, Wikipedia, Facebook, etc. Please contact us to arrange a free demo of this unique product.
